Huge security for huge capacities

GR7650 is designed for those who require large capacity and highly reliable data protection. 4 x 3.5" SATA hard drives and a new RAID 5 controller keep GR7650 working without interruption even if a hard drive. It can be changed while the system runs. Even with a USB connection to the computer capacities of more than 2.2TB are recognized – if the computer has a 64-bit OS with GPT. GR7650 is collocated with Web-based GUI as well which is helpful to manage the system and update firmware freely. Equipped with a buzz and the Web-based GUI to monitor the system, the GR 7650 reports fan failure, critical temperature or hard drive failure by the buzz sound and e-mail.
